The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 9-10, 13-18, 20, 22-27, 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Gazdzinski (2001/0051766).

Gazdzinski discloses device that has an in vivo sensing device that transmits and receives signals from an external device using a phased array transducer or antenna. Grazdinski also teaches that it is known to use an image sensor (see abstract) to provide visual image data from inside the body. Grazdinski further discloses that it is well known to use an RFID tag that can be used to tract the location or position of the device (see Figure 17).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishikawa et al, Marshall, Ben-Haim et al and Kilcoyne et al are cited to further show the state of the art.
